

Sejal Patil

Software Development Engineer II | Frontend & Full-Stack Engineer

Bangalore, Karnataka | 8310610495 | patilsejal8088@gmail.com | [linkedin.com/in/sejal-patil-102b61223](https://www.linkedin.com/in/sejal-patil-102b61223)

Profile

Frontend-focused Software Engineer with 2+ years of experience building responsive, scalable, high-traffic web applications using React, Next.js, TypeScript and full-stack solutions with FastAPI and Python. **Founding team member** at a fintech startup, where I **single-handedly built and owned the entire frontend** while also contributing to backend development. Proven track record delivering secure, high-performance payment systems processing **80+ transactions per second** and platforms serving 10,000+ daily users. Skilled at API integration, performance optimization, and clean, maintainable code within collaborative agile teams.

Skills

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Redux Toolkit, Tailwind CSS, Material UI, HTML5, CSS3, Responsive Design

Backend: FastAPI, Python, RESTful APIs, WebSockets, Amazon SQS

Tools & Practices: Git, Bitbucket, Agile/Scrum, Performance Optimization, Code Splitting & Lazy Loading, Custom Component Design

Work Experience

Software Development Engineer II (SDE-2) —

Bangalore, India

Founding Team Member

Feb 2025 – Present

Bluswap / FastFlowPe – Finex Payment Solutions

- Joined as a **founding member** of FastFlowPe and independently owned the entire frontend end-to-end, from architecture to deployment, for the payment gateway platform.
- Built a scalable payment gateway platform enabling secure Payin (customer-to-merchant) and Payout (merchant-to-vendor) transaction flows.
- Also contributed to backend development, stepping beyond frontend scope to support API and service logic as part of a lean founding team.
- Engineered a high-performance transaction system handling **80+ transactions per second (TPS)**, ensuring low-latency processing at scale.
- Integrated banking and PSP APIs, including Axis Bank APIs and multiple payment service providers, to enable secure fund movement.
- Built and optimized D2C checkout flows with responsive UI, improving customer conversion and transaction success rates.
- Delivered secure wallet management, bill-payment, and QR-based transaction features for a seamless digital payment experience.

Full Stack Developer

Bangalore, India

Oct 2023 – Feb 2025

Physics Wallah

- Built the frontend of the PW Skills website using React.js, supporting **10,000+ daily visitors**.
- Improved load times through lazy loading and code splitting, boosting overall site performance.
- Implemented real-time features via WebSockets for instant feedback and notifications.
- Partnered with backend teams to integrate AI-powered grading via RESTful APIs.

Projects

Digital Payment Platform

- Developed responsive, user-centric interfaces with React.js, TypeScript, and Tailwind CSS.
- Integrated banking and PSP APIs for real-time transactions, balance checks, and account linking.
- Collaborated with backend, design, and QA teams in an agile workflow using Git/Bitbucket.

Learning Management System (LMS)

- Built AI-powered automated evaluation handling **1,000+ assignment submissions daily**.
- Used Amazon SQS for asynchronous messaging between backend services, ensuring reliable communication.
- Supported a platform with **50,000+ user visits and 300,000+ enrolled users**.

Education

Bachelor's in Computer Application
2019 – 2022
